444 Spanish Gold

SWEET CORN

You get the sweetest corn fresh from your own garden.

439—**Golden Sunshine.** (67 days) The same flavor and color as Golden Bantam, but earlier. Ears are also larger, being 12-rowed instead of 8.

445 **Golden Bantam.** (75 days) Still a big seller. Everyone knows this popular variety.

446 **Improved Golden Bantam.** (78 days) Larger and deeper kernels than Golden Bantam. Fine flavor.

444 **Spanish Gold.** (65 days) The best of the real earlies. Good sized ears; finest quality.

447 **Oregon Evergreen.** (90 days) An earlier cross of Stowells; in our opinion a little better. Strong, firm husks prevent worm damage to a large degree.

Priced: Pkt. 15c; ¼ lb. 25c; ½ lb. 45c; Lb. 70c. Postpaid.

Not Postpaid: 1 Lb. 45c; 5 to 9 lb., 40c lb.; 10 lb. up 37c lb.

453 **EXTRA EARLY GOLDEN MIDGET** (60 days) Grow this variety where your season is too short for most varieties of sweet corn. Plants grow about 3 feet tall, suckering heavily and producing an ear of corn on most of the suckers. Ears 4 to 4½ inches long with 8 rows of medium yellow corn of excellent quality and flavor.

Pkt. 20c; ¼ lb. 30c; ½ lb. 50c; 1 lb. 85c. Postpaid.

HYBRID SWEET CORN

Far superior to open pollinated sweet corn. Husk wraps higher and tighter on ear, less worm damage. Ears more uniform, better yielder, fine flavor, sturdy stalks and roots.

Hybrid seed not true to type the second year.

440 **Tendergold.** (78 days) Top cross, stalks medium, deep kernels, beautiful golden color; 10 to 12 rows.

512 Sage. Used as seasoning. Broad leaf variety. **Pkt. 15c.**

Plant Virus Free Strawberries—Page 12 and 15

LETTUCE

Lettuce should be planted in rows 18 to 24 inches apart. Leaf varieties can be planted quite thick; the heading varieties require less seed and should be thinned to one plant every 10 to 14 inches.

524-**BIBB Distinct.** Very dark green butterhead variety. Small plant forming a small folded head.

525-**COS or Romaine.** Distinct form and flavor. Upright tightly folded heads about 10 inch tall. Good size, dark green color on outer leaves. Pale green to white hearts. Needs no tying up.

537 **Great Lakes**

537 **Great Lakes. . . .** (All) American winner 82 days. We believe Great Lakes is the surest to head of any of the newer varieties and also surpasses many of the old varieties. Especially valuable as a market variety. Withstands heat and heads under a wide range of conditions. Heads are a crisp dark green, extremely solid with fine flavor and texture.

535 **Imperial 847.** (86 days.) Black seeded. Blight resistant, also resistant to heat; quite sure to head under unfavorable conditions; heads large and sweet; good keeper.

544 **New York No. 12.** (82 days.) An old standard head lettuce with large crisp, dark green,heavily curled heads. Hearts are tightly folded and will blanch to a silvery white.

541 **Mountain Iceberg Head.** (81 days.) Immense heads having closely folded leaves. Inner portion blanches readily and is always tops in flavor. We believe this lettuce to be a better quality and flavor than Great Lakes.

Pkt. 15c; ½ oz. 25c; 1 oz. 45c; ¼ lb. $1.35; ½ lb. $2.50; 1 lb. $4.25 Postpaid.

531 **Sald Bowl** A new introduction for home and market. Plants are large, medium green, very slow bolting. Distince loose leaves are long, deeply cut and are so tender they are easily damaged. **Pkt. 20c; ½ oz. 45c; oz. 75c.**

532 **Oak Leaf** An old variety still very popular for home gardens. Produces dark green leaves and has good resistance to hot weather.

538 **Mignonette.** (65 days.) Heads are medium small, compact and hard; outer leaves have brownish cast, heavily crumpled. Interior is good quality and almost white.

539 **Improved Hanson.** (80 days.) The most reliable variety for general planting; stands hot weather better than any other type. Sure heading.

540 **May King.** (65 days.) Quickly forms fine hard heads, resembling small cabbages. Hardy, will bear transplanting.

529 **Early Curled Simpson. Silesia Early Curled.** (46 days.) The old-time curly lettuce, and still very popular. A quick growing, hardy variety. It forms a tight bunch of leaves.

528 **Black Seeded Simpson.** (46 days.) Very tender and of excellent flavor. A good leaf lettuce.

530 **Early Prize Head.** (50 days.) A home garden favorite. Not a head lettuce, but makes a large and distinct bunch of leaves at the heart. Leaves are reddish bronze at tips.

527 **Improved Grand Rapids.** (46 days.) Well adapted for early spring planting or greenhouse forcing. Does not form a head.

Prices: Pkt. 15c; oz. 25c; ¼ lb. 65c; lb. $1.95. Postpaid

BETTER PASTURES FEED MORE CATTLE

THE FOLLOWING GRASSES FOR HAY OR PASTURE

TALL WHEAT — A rank growing bunch grass. It is very tolerant to Alkali and poor soils. It starts early in the spring and grows late in the fall. It is a good soil building and pasture grass, however it should be pastured heavy so as it does not become rank.

BROME GRASS (Bromus Inermis)—Yields enormous crops of splendid hay, and affords early and abundant pasture.

PERMANENT PASTURE MIXTURE—We highly recommend the following ratio for a well balanced permanent pasture mixture: 25% Orchard Grass; 30% Brome Grass; 20% Perennial Rye Grass; 17% Meadow Fescue and 8% Yellow Blossom Sweet Clover. Sow 25 to 30 pounds per acre. Sow broadcast, cover lightly and keep wet until well started.

ORCHARD GRASS—Often sown with Alfalfa to give a stronger and better hay. It will stand drought or will do well in the shade. Orchard Grass gives a heavy tonnage in permanent pasture, furnishes the first green bite in the spring and the last in the fall.

INTERMEDIATE WHEATGRASS—A sod forming grass introduced from U. S. D. A. It is more drought resistant than smooth brome. The plants start in early spring and are relished by all livestock.

TIMOTHY—Of hay grasses, Timothy leads all. Thrives on clay or heavy loams, wet or boggy soils, or in mountainous districts. At higher elevations where fewer grasses and clovers are adaptable, Timothy is the most important hay and pasture crop. Alone, sow 12 pounds to the acre, or with clover, 10 pounds Timothy and 6 pounds clover.

RUSSIAN WILD RYEGRASS—It is a very excellent perennial bunchgrass, having a very deep fiberous root system. It produces well on poor soil conditions and produces much better on good soil conditions. It is extremely drouth resistant and yet produces very well when irrigated several times a year. It starts growth very early in the spring and keeps on growing right through the summer if it is grazed down properly. It recovers very rapidly as it is grazed or cut for hay. Generally, it appears to be a much better pasture grass than Crested Wheatgrass and a lot of other native grasses. It is very high in protein and stays green practically all summer if managed properly.

WESTERN WHEATGRASS—This variety is also known as Bluestem Wheatgrass and is a native perennial. It is a sod-former with a deep, fiberous, root system and is very effective in protecting the soil from wind and water erosion. It produces a good forage early in the spring and then is dormant during the summer months and again produces a relatively small amount of good forage in the fall of the year. It is very highly platable when pastured properly or cut at the right time for hay.

"MILE HIGH" PEAK OF QUALITY
WESTERN COLORADO GROWN

HARDY STRAINS ALFALFA AND CLOVER

LADAK. A wilt-resistant variety, is slow to start in the spring, but it resists drought and produces a good yield of hay. Leafy and of high feeding value, and will hold a stand longer than other varieties.

COMMON. Deep-rooted, excellent for hay; but must have a deep soil. Therefore, if you do not have over two and a half feet of good soil to water, shale, or gravel, we suggest that you use Grimm.

RANGER ALFALFA—Ranger is the most wilt resistant alfalfa available, it yields slightly less than Grimm, but is very cold resistant and recovers quickly from cutting.

BIRDSFOOT TREFOIL CLOVER—Withstands moderate alkali and wide fluctuations of moisture. Produces very palatable and nutritious forage. As far as has been determined to date it DOES NOT bloat or scoure stock. It is very necessary to treat Trefoil with nitragin.

STRAWBERRY CLOVER. Western Colorado grown seed. It thrives on wet, seepy soil, even though there is a lot of alkali. Best suited for pasture; spreads from root and seed—a perennial plant. Requires 3 lbs. of seed per acre. For best results, sow in rows with garden seed planter, if possible.

MEDIUM RED CLOVER. A biennial plant; fine for hay and pasture; good producer of nitrogen. Excellant soil builder.

HUBAM SWEET CLOVER. An annual rapid growth, coarse and fibery· develops rapidly and produces seed the first year; for soil building or cover crop.

YELLOW BLOSSOM SWEET CLOVER. A biennial for hay and pasture; also a very good cover crop and soil builder.

WHITE BLOSSOM SWEET CLOVER. A biennial coarser than Yellow Blossom; a good cover crop; not as good for hay or pasture.

LADINO CLOVER. A long-lived perennial. Its growth is large and luxuriant. When the leaf growth has been grazed off, new leaves develop quickly, complete recovery occurring in 17 to 28 days. It is strictly a crop for irrigation. Sow in fall or spring at the rate of 4 to 6 pounds per acre.

ALSIKE CLOVER. Especially valuable for growing with timothy in high altitudes. Hardy and withstands wet ground.

Plant Mile High Lawn Grasses!

MERION BLUE GRASS. The Newest Turf Grass. Similar to Kentucky Blue, but makes a much better lawn. Is more disease resistant, stands drought better and holds a greener color all year long. While the price per pound may seem high, 1 pound will cover about 400 to 500 square feet and reseeding or repairing is usually not necessary. May be sown alone, but in our area a mixture of about 70% Merion with other grasses may be preferred.

½ lb. $1.25; 1 lb. $2.15; 2 lb. $3.80; 5 lb. $8.60 **Postpaid**

70% MERION BLUE GRASS mixed with 20% Kentucky Blue Grass and 10% White Dutch Clover. This mixture will give you a good Merion Blue lawn but comes quicker and establishes a good lawn faster than straight Merion Blue Grass.

½ lb. $1.20; 1 lb. $2.10; 2 lb. $3.75; 5 lb. $8.50 **Postpaid**

KENTUCKY BLUE GRASS. The most desirable grass for a beautiful lawn. The leaves are narrow and deep green in color. It forms a close turf, is slightly creeping and quite hardy. It is recommended alone or in mixtures.

½ lb. .75c; 1 lb. $1.25; 2 lb. $2.00; 5 lb. $4.10 **Postpaid**

MILE HIGH LAWN GRASS MIXTURE. The bset mixture to plant for the average lawn. Mile High Lawn Mixture is made up of permanent grasses that will start quickly and that make a good lawn the first year. All fine grasses also contains a good supply of White Dutch Clover. For that good lawn plant Mile High Lawn Grass Mixture.

½ lb. .75c; 1 lb. $1.25; 2 lb. $2.00; 5 lb. $4.10 **Postpaid**

PEAK OR PLAYGROUND LAWN MIXTURE% This blend of grasses has proven very satisfactory where you must have a hardy lawn or where your soil is poor. Comes up quickly and will stand lots of wear. All of the grasses in this mixture are perennials and there is NO TIMOTHY in any of our mixtures.

½ lb. .70c; 1 lb. $1.15; 2 lb. $1.80; 5 lb. $3.60 **Postpaid**

SPECIAL SHADY MIXTURE. A mixture of grasses that are known to stand shade from trees or buildings better than ordinary grasses. We have spared no expense to make this the best shady lawn mixture possible. It does not contain any clover.

½ lb. .70c; 1 lb. $1.15; 2 lb. $1.80; 5 lb. $3.60 **Postpaid**

ENGLISH BLUE GRASS. Is recommended for lawn use alone or with other grasses. Especially adapted where soil is poor or where lawn is to be used hard for play ground purposes.

½ lb. .65c; 1 lb. $1.00; 2 lb. $1.65; 5 lb. $3.20 **Postpaid**

WHITE DUTCH CLOVER. (Trifolium Repens). Is a small, close growing, dwarf clover, used extensively in making lawns. It is a rapid grower of spreading habits and can be cut very close to the ground without injury to the plant. It starts regrowing at once after cutting. Very useful in lawn mixtures.

½ lb. .90c; 1 lb. $1.55; 2 lb. $2.60; 5 lb. $5.60 **Postpaid**

FOR FASTER AND STRONGER GROWTH

SALE OF PEAT POTS is now growing by leaps and bounds with our own JACK POT leading the way.

JACK POT is made stronger, and yet is porous enough to permit quick, easy penetration of feeder roots immediately after transplanting. The pot will then disintegrate and the decayed pot material will improve the soil and help retain moisture.

FLOWERS

CULTURE

A good sandy loam soil supplemented with well rotted manure and a small portion of commercial fertilizer is the ideal soil for flowers. Flowers will always do better if watered from a small trench dug along the sides of the plant.

DO NOT LET THE GROUND DRY OUT OR CRUST.

The following symbols are used in connection with each item:

A—Annuals: The plants live and bloom one season only.

B—Biennial: The plants live two seasons, often blooming the first year when planted early.

P—Perennial: The plants usually live from year to year.

H—Hardy: Plants that are easily grown and resist average seasonal extremes of temperature.

H-H—Half-hardy.

T—Tender.

Approximate height of each plant is also given.

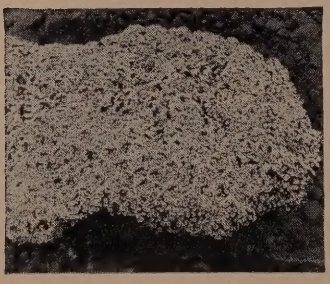
We offer on the following pages a list of worthwhile flowers that are grown from seed. You will enjoy a flower garden. Plant one.

ALYSSUM

822 Little Gem. (HA)Small white flowers completely cover the dwarf compact plants, which grow only 4 to 5 inches tall. Wonderful for edgings. **Pkt. 15c**

823 Gold Dust. (P-12 In.) Brilliant golden yellow flowers borne s profusely as to hide the plants. **Pkt. 20c**



825 Snow Cloth

824 Alyssum Violet Queen. (HA 4-In.) Edging plant with a color peculiarly its own, being of a very pretty violet tint much deeper in color than the Alyssum Lilac Carpet offered previously, does not fade in hot weather. Has the usual honey-like odor of the white variety. **Pkt. 15c.**

825 Snow Cloth. The pure white flowers are so freely produced on dwarf plants as to give the impression of a white carpet. A favorite variety for edging. While plants seldom grow over 2 to 3 inches in height, they spread considerably. **Pkt. 15c.**

ASTERS

IF YOU should have any trouble raising Asters—TRY OUR WILT RESISTANT STRAINS. Perhaps your soil is infested with aster wilt.

All Asters Listed Below Are Wilt Resistant Strains.

POWDERPUFFS

830 Powderpuffs are tailor made for home gardens because the plant type is entirely different from other asters. Imagine a ribbon of these beautiful flowers, blooms 3 to 3½ inches across, and so many of them the foliage litterally cannot be seen. Plants 24 inches high. Many colors mixed.—Pkt. 20c.

IMPROVED GIANT CREGO

(HA; 2 ft.) Very large, fully double flowers, 4 to 5 in. across, with long ribbon-like petals gracefully curled and twisted, giving them a lovely fluffy appearance. The plants are strong growing of branching habit. Long stemmed; fine for cutting.

839 Crimson. **842 White.**

840 Shell Pink. **843 Purple.**
